

HARI ARI S

SENIOR MANAGER – IT | IT INFRASTRUCTURE | ENTERPRISE ARCHITECTURE | ERP TRANSFORMATION

Bengaluru / Hosur | 8122503754 | hariari07@gmail.com

PROFESSIONAL SUMMARY

IT infrastructure and enterprise technology professional with 18+ years of experience across IT infrastructure, enterprise architecture, ERP transformation, cybersecurity, virtualization, backup and disaster recovery. Currently serving as IT Infrastructure Lead / Enterprise Architect, with responsibility for designing scalable, cost-efficient and vendor-independent technology environments. Demonstrated business impact includes ₹20+ lakh annual IT cost savings, elimination of recurring licensing/AMC costs, development of a company-owned ERP platform, and implementation of resilient backup and disaster-recovery architecture.

CORE COMPETENCIES

IT Strategy & Infrastructure Roadmap | Enterprise Architecture | IT Operations & Service Management | ERP Strategy & Transformation | Infrastructure Cost Optimization | Vendor & License Management | Cybersecurity & Network Security | Backup & Disaster Recovery | Business Continuity Planning | Virtualization & Server Infrastructure | Network Architecture, Routing & Switching | Linux & Windows Server | Open-Source Enterprise Platforms | Ransomware Protection Strategy | Data Protection & Recovery | Technology Standardization | IT Infrastructure Design | Business-Aligned IT Transformation

CAREER HIGHLIGHTS

- Delivered ₹20+ lakh in annual IT cost savings through open-source adoption, ERP ownership and reduction of recurring licensing and AMC expenditure.
- Designed a vendor-independent enterprise IT ecosystem covering infrastructure, ERP, security, backup and recovery.
- Developed a company-owned ERP platform covering Purchase, Inventory, HR, Finance and workflow automation, with zero license cost, zero AMC and unlimited-user architecture as described in the source resume.
- Designed VM-based, hardware-independent infrastructure using Proxmox virtualization.
- Implemented network segmentation/isolation, ransomware protection strategy and multi-location backup architecture.
- Owned the end-to-end IT infrastructure lifecycle from architecture and deployment through security, backup and disaster recovery.

PROFESSIONAL EXPERIENCE

IT Infrastructure / Cybersecurity | AvioHelitronics Infosystems pvt ltd | Sr.Manager 2026 – Present

IT Infrastructure Lead | Lake Chemicals Pvt Ltd | Sr.Executive 2016 – 2026

- Lead enterprise IT infrastructure architecture covering servers, networking, firewall, virtualization, security and data protection.
- Define and execute long-term IT architecture and infrastructure direction aligned with business requirements.
- Designed and implemented Proxmox-based virtualized infrastructure to support a scalable, hardware-independent environment.
- Developed and managed a company-owned ERP platform spanning Purchase, Inventory, HR, Finance and workflow automation.
- Reduced technology operating costs by eliminating or minimizing recurring software licensing, ERP AMC and infrastructure AMC expenditure.
- Drive vendor-independent technology adoption and reduce dependency on proprietary platforms where open-source alternatives are suitable.
- Designed secure backup and disaster recovery architecture, including multi-location backup and recovery planning.
- Implemented network segmentation and isolation controls as part of the cybersecurity and ransomware-resilience strategy.
- Manage enterprise IT operations across infrastructure, platforms, security, backup and recovery environments.

Senior System Engineer | Sri Tech | 2015 – 2016

- Supported enterprise systems and IT infrastructure operations.
- Handled system administration and technical troubleshooting activities.

Senior Systems Engineer | Hi Tech Computers | 2014 – 2015

- Supported systems, infrastructure and end-user technology environments.
- Performed technical troubleshooting and system support activities.

Senior Service Engineer | Hosur IT Support | 2011 – 2014

- Provided IT service and technical support for computing environments.
- Handled system troubleshooting, maintenance and user support.

System Engineer | GKV Computers | 2009 – 2011

- Performed system engineering, technical support and infrastructure maintenance activities.

Junior Engineer | Acer Service | 2008 – 2009

- Provided computer hardware/service and technical support.

Junior Engineer | Tech Service | 2007

- Provided technical service and support activities.

TECHNOLOGY & TOOLS

Infrastructure & Operating Systems: Windows Server, Linux, Server Infrastructure, Virtualization

Virtualization & Platforms: Proxmox, Nextcloud, OnlyOffice

Networking & Security: Firewall, Routing, Switching, Network Segmentation, Network Isolation, Ransomware Protection

Backup & DR: Duplicati, Multi-location Backup, Disaster Recovery Planning, Data Protection

Enterprise Applications: Company-owned ERP, Purchase, Inventory, HR, Finance, Workflow Automation

Databases & Analytics: MySQL, Apache Superset

Messaging: Postfix, Dovecot

SELECTED IT TRANSFORMATION INITIATIVES

- In-House ERP Transformation – Built a full ERP platform covering core business workflows and enterprise functions.
- Open-Source Enterprise Migration – Replaced recurring-cost software components with suitable open-source platforms.
- Virtualized Infrastructure – Established Proxmox-based VM infrastructure designed for hardware independence and scalability.
- Cybersecurity Architecture – Implemented network segmentation/isolation and a ransomware-protection strategy.
- Disaster Recovery – Developed multi-location backup and recovery architecture to improve resilience and recoverability.

EDUCATION

Secondary School Education | St. Joseph Higher Secondary School, Hosur

ADDITIONAL INFORMATION

- Total Experience: 18+ years
- Location: Bengaluru / Hosur
- Target Roles: Senior Manager – IT | IT Infrastructure Manager | IT Operations Manager | Enterprise IT Manager | Enterprise Architect

INFORMATION TO COMPLETE BEFORE FINAL SUBMISSION

- Add highest academic qualification (Diploma / Degree / MCA / other), if applicable.
- Add professional certifications, if held (e.g., ITIL, Microsoft, Linux, networking, cybersecurity, virtualization).
- Add current team size and direct/indirect reporting scope, if applicable.
- Add annual IT budget / CAPEX / OPEX responsibility, if applicable.
- Add measurable uptime, incident reduction, project delivery timelines, migration volumes, user/server counts and recovery targets where available.

- Add cloud platforms (AWS/Azure/GCP), Microsoft 365, endpoint management, SIEM, IAM or other technologies only if actually used.
- Add ERP technology stack, programming/database details and integrations if applicable.
- Add LinkedIn URL and preferred professional location.
